

**DEPARTMENT OF COMPUTER SCIENCE ENGINEERING**

**Synopsis**

**Course name: Mini Project**

**Course Code: 20CSE59**

**Semester Duration: OCT 21- JAN22**

**Student details:**

USN	Name of the student	Section	Date of Submission	Signature
1NH19CS202	YASHAS KALATHUR ACHARYA	D	11/11/2021	

**PERSONAL TASK MANAGER**

**Problem Statement**

We all know how hectic is the schedule of a person is in this day and age. There could be certain tasks or goals that a person wants to complete but since he or she doesn't have a right schedule set for them, they aren't able to complete it. This leads to piling up of the tasks which then increases the burden. At times the person has so many tasks to be completed that they could forget some really important task and it could lead to bad consequences.

**Outcomes**

- The main purpose of a Personal Task Manager is to manage all the daily tasks and activities.
- It helps us to maintain a daily routine which helps us to lead a better and easy life.
- The Project will have a GUI and we will be able to Add, Delete, Update and Edit the entries that were made.
- When its time for the particular task, a Desktop Notification will pop up which will remind the user to complete the particular task. Once the user confirms that he has completed the task, it will be updated in the Database.

**Requirement Specifications**

- OS- Microsoft Windows 10
- Processor – AMD Ryzen 5 4600H
- Memory 2GB RAM
- Python 3.9.1
- Visual Studio Code
- MySQL Database

**Signature of Reviewer with Date**
